

*The power to stay healthy is in your hands.*

**Smart-San™**  
hand sanitizer spray

- Kills 99.999% of Germs in 15 seconds
- Food-Grade Safe\*, FDA Compliant  
\*Applies to Smart-San Fragrance-Free
- Protects and Softens the Skin
- Liquid formula saturates under and around the fingernails and cuticles

### The science...

More than 90% of the bacteria on the hands are found underneath the fingernails and around the cuticle areas. These are also the areas of the hands most often missed in hand washing with soap and water.

Best Sanitizers has developed an advanced liquid rinse hand sanitizer, which, unlike gels, will easily saturate these critical areas of the hands, killing 99.999% of bacteria.

### The delivery...

Smart-San is atomized with high quality HandMyst pump sprayers, giving you the very best coverage and efficacy available in a hand sanitizer.

Best Sanitizers' state-of-the-art touchless dispensers offer the ultimate delivery of hand sanitizer, reducing the risk of cross-contamination.

### The difference...

The moment you try Smart-San, you know the difference. The light, liquid formula evaporates quickly while natural emollients are absorbed into the skin, leaving the hands feeling soft and replenished.

# Testimonials

"Given the critical nature of our work, we were seeking a way to offer our employees some added protection. We purchased several AutoMyst units with Smart-San Hand Sanitizer. Our employees are thrilled with the added benefit and use the product religiously. We highly recommend Best Sanitizers. Their personnel were very responsive to our needs and their products far surpassed our expectations."

**Gina Knepp**  
Police Manager, Communications Division  
Sacramento City Police Department

"The management team at our facility is very happy with Smart-San Hand Sanitizers and our employees love them. They especially like the automated feature. They have commented on how their hands do not feel dry or itchy after using Smart-San. The decision to purchase your products was a "no brainer" for our Safety Team. The employees are out less due to sickness, our production worker illness and the employees appreciate the fact that we have invested in their overall safety and well being."

### **SANiSHOT Touchless Sanitizer Dispenser - AD10042**

Utilizing a collapsible bottle, the SANiSHOT simplifies the refill process and cuts down on waste disposal. This automatic dispenser delivers a pre-measured amount of sanitizer (approx. 1 mL) giving the user approximately 1,000 dispenses per refill. Protected downward spray makes this dispenser appropriate even in public areas. The SANiSHOT can be wall-mounted or used with either of our countertop or portable stands.

### **AutoMyst Touchless Dispenser - AD10020**

The AutoMyst has become the standard among touch-free dispensers. Infrared sensor technology detects the presence of hands, dispensing a pre-measured application of atomized sanitizer (approx. 1 mL). Pre-filled 1 liter cartridges fit easily into the AutoMyst for simple maintenance. The AutoMyst can be placed on desks or countertops, wall mounted, or used with our optional portable stand. Do not place in areas where children are unattended.

### **Wrist-Activated Manual Sanitizer Dispenser - MD10010**

Best Sanitizers' Wrist-Activated Dispenser has a simple and versatile design that is well-suited for use in a variety of environments. Economical and practical, this dispenser can be placed on a counter top or wall-mounted. Uses 1 liter refills of Smart-San Hand Sanitizer. Includes reusable atomizing pump kit and mounting hardware.

### **SANiSHOT Manual Sanitizer Dispenser - MD10016 (shown) & MD10018**

Utilizing a disposable bag refill, the SANiSHOT simplifies the refill process and cuts down on waste disposal. This manual dispenser delivers a pre-measured amount of sanitizer (approx. 1 mL) giving the user approximately 1,000 dispenses per refill. Protected downward spray makes this dispenser appropriate even in public areas.
